**PERSONAL SUMMARY**

Senior Frontend Developer with 8+ years of experience in developing and optimizing high-performance web applications, specializing in Angular and React/NextJS.

Proven leadership as a Frontend Team Lead for 3+ years, managing developers, setting coding conventions, and implementing scalable Micro Frontend architecture. Adept at analyzing complex requirements, proposing solutions, and collaborating effectively with cross-functional teams including Product Owners, Designers, and Backend Developers.

Strong in performance optimization, SEO best practices, and Frontend testing (Jest, Cypress). Experienced in CI/CD deployment using Docker on Linux servers. Passionate about clean code, reusable component design, and delivering user-centric digital products.

Currently seeking opportunities to contribute technical leadership and frontend expertise to impactful projects in a dynamic team environment.

TECHNICAL SKILLS**Frontend Framework & Architecture**

- Angular (Nx Monorepo, Micro Frontend, Module Federation).
- ReactJS / NextJS (SSR, SEO Optimization)
- Component-driven Architecture

UI & Component Libraries

- Angular Material, Ng-Zorro, Ant Design.
- Tailwind CSS, Bootstrap.
- Storybook (Component Documentation).

State Management & Performance

- RxJS, Reactive Forms.
- State Management Patterns.
- Lazy Loading, Code Splitting, Bundle Optimization.
- Caching Strategies.

Backend & Integration

- NodeJS (NestJS, ExpressJS).
- REST API Integration.
- PHP (Laravel, Wordpress).
- Python (Odoo).
- MySQL, MongoDB, PostgreSQL.

DevOps & Deployment

- Docker (Multi-stage build)
- Kubernetes (Deployment, Basic Monitoring)
- Nginx
- Linux (Ubuntu, CentOS)
- AWS (EC2, Route53, S3, Cloudfront, Quicksight, IAM)

Testing & Code Quality

- Jest, Cypress.
- Unit Testing, E2E Testing.
- ESLint, Prettier.

Build Tools & Development Tools

- Webpack, Vite.
- NPM.
- Composer.
- Git, GitLab CI.
- Postman, Swagger.
- Figma (Design Collaboration).

WORK EXPERIENCE

Frontend Team Leader

Company: VELA Digitalized Logistics

Duration: 07/2023 – Present

Responsibilities:

- Led a frontend team of 8 developers for multi-tenant logistics platform serving internal and external enterprise users.

- Designed and implemented Micro Frontend architecture using Nx Monorepo (1 Host + multiple Remotes: Portal, Supplier, Customer), enabling independent deployment and parallel team development.
- Established coding standards, code review workflow, and CI/CD pipeline using Docker and Kubernetes to improve deployment consistency and release stability.
- Optimized frontend performance by improving bundle size, lazy loading, and caching strategies.
- Developed scalable UI components and application features using Angular.
- Collaborated directly with Product Manager and Backend teams to deliver large-scale portal systems.
- Reviewed pull requests and enforced code quality standards across frontend repositories.
- Defined and managed Git branching strategy (GitFlow-based) to control feature development, staging, and production releases.

Senior Frontend Developer

Company: AMIT GROUP JOINT STOCK COMPANY

Duration: 01/2019 – 07/2023

Responsibilities:

- Led small frontend teams (3–5 developers) to deliver multiple enterprise and customer-facing web applications.
- Developed and delivered multiple enterprise and client-facing web applications using Angular, React, and WordPress.
- Built and integrated REST APIs using backend frameworks (NodeJS, Laravel) to support frontend features.
- Deployed and maintained web applications on Linux servers, including environment setup and production deployment.
- Planned and assigned frontend tasks, managed workload distribution, and supported junior developers.
- Established coding standards and conducted code reviews to ensure code quality and maintainability.
- Participated in project estimation, technical scoping, and quotation process with project managers.
- Provided technical mentoring and support across multiple projects.
- Worked directly with customers to gather requirements, clarify technical constraints, and deliver project solutions.

Frontend Internship

Company: AMIT GROUP JOINT STOCK COMPANY

Duration: 09/2018 – 12/2018

Responsibilities:

- Convert PSD to HTML.
- Process data between Client and Server using AJAX.

PROJECT

VELA Logistics Platform (Core, Customer, Supplier Portals)

Multi-portal logistics platform including Core Portal (internal operations), Customer Portal (multi-tenant), and Supplier Portal.

Duration: 07/2023 - Present

Team Size: 60

Role: Frontend Team Lead

Technologies Used: Angular, Nx Monorepo, Micro Frontend, Docker, Kubernetes, .NET

Responsibilities:

- Architected frontend system for 3 portals: Core Portal (internal operations), Customer Portal (multi-tenant), and Supplier Portal.
- Designed and implemented Micro Frontend architecture using Nx Monorepo (1 Host + multiple Remotes).
- Built multi-tenant frontend architecture for Customer Portal supporting tenant-based configuration and isolation.
- Led frontend team of 8 developers across multiple portal modules.
- Built CI/CD pipelines with Docker and Kubernetes.
- Optimized frontend performance and deployment stability.
- Collaborated with Product Manager and Backend teams to deliver enterprise-scale portals.

SOGUS

A system that allows screening and evaluating candidates through taking tests with many forms such as multiple choice, essay...

Duration: 11/2022 - 07/2023

Team Size: 10

Role: Frontend Leader

Technologies Used: Angular, React, NextJS, Java, PostgreSQL

Responsibilities:

- Led frontend team to develop an online examination and assessment platform supporting multiple test formats.
- Designed frontend architecture using Angular and React/NextJS to ensure scalability and maintainability.
- Reviewed pull requests and enforced coding standards to maintain code quality.
- Planned and assigned tasks, tracked progress, and ensured on-time delivery.
- Collaborated with stakeholders to analyze requirements and propose technical solutions.

Medbuy

An e-commerce website serving the sale of drugs between suppliers, agents, and users

Duration: 12/2022 - 07/2023

Team Size: 10

Role: Frontend Developer

Technologies Used: React, NextJS, NodeJS, NestJS.

Responsibilities:

- Developed responsive user interfaces using React and NextJS based on design specifications.
- Collaborated closely with UX/UI designers to improve usability and user experience.
- Integrated frontend with backend APIs and supported feature implementation.
- Participated in containerized deployment process using Docker.
- Worked with Backend team to design and integrate REST APIs.

Kensa Order System

Order and customer management system. Track the status of existing orders. Consolidate and report daily and monthly revenue.

In addition, users can also create and pay for their own orders through the website.

Duration: 03/2021 - 07/2021

Team Size: 2

Role: Full Stack Developer

Technologies Used: React, PHP, Laravel, MySQL, Docker

Responsibilities:

- Designed and developed fullstack order management system including Admin Portal and Customer Portal.
- Built REST APIs using Laravel to support order processing and reporting features.
- Integrated online payment gateways (VNPay, Payoo) for secure transaction handling.
- Deployed production system on Linux server using Docker.
- Worked directly with customers to gather requirements and deliver technical solutions.

Kilu

An e-commerce website that allows buying and selling used motorbikes.

Duration: 06/2020 - 10/2020

Team Size: 4

Role: Full Stack Developer

Technologies Used: PHP, WordPress

Responsibilities:

- Developed custom WordPress features based on business requirements.

- Optimized website performance and SEO ranking.
- Customized themes and plugins for marketplace workflows.

EDUCATION HISTORY

Ho Chi Minh City University of Transport and Communication

Bachelor's Degree in Information Technology – Graduated 2018
