Bùi Thanh Phương

SENIOR FRONTEND DEVELOPER · REACT / NEXT.JS

+84 964 747 781 / btphuong2017@gmail.com / btphuong2017.github.io / Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Senior Frontend Developer building, testing and operating high-performance web applications in JavaScript/TypeScript since 2018, at enterprise scale. Deep expertise in React/Next.js with Server-Side Rendering (SSR), bundle optimization, Micro Frontend architecture (Nx Monorepo), and CI/CD for containerized deployments (Docker, Kubernetes). Strong TypeScript foundation across both the React/Next.js and Angular ecosystems. Hands-on team leader with a strong testing, debugging and code-quality discipline across the full release lifecycle. Seeking a senior frontend role with end-to-end ownership of frontend architecture and product quality.

WORK EXPERIENCE

Senior Frontend Developer
Sep 2026 – Present

FPT Software

Main project: UAV.

Frontend Team Leader (hands-on)
Jul 2023 – Mar 2026

Indo Trans Logistics — Ho Chi Minh City

VELA Logistics Platform — logistics platform with 3 portals: Core Portal (internal operations), Customer Portal and Supplier Portal, all three designed for multi-tenancy. Project team of **60**; led the frontend team of **8**.

- Architected the **Angular** frontend for all **3 portals** in TypeScript — a single-application Core Portal, and two Nx-based Micro Frontend platforms (**1 Host + multiple Remotes** each) for the Customer and Supplier Portals, enabling independent deployment and parallel team development.
- Reduced the Core Portal's initial bundle size from **12 MB to 3 MB** through bundle analysis, dependency import optimization, code splitting and route-based lazy loading — significantly improving initial load and rendering performance.
- Designed tenant-based configuration and isolation across the three portals, with **3 tenants** on the Customer and Supplier Portals.
- Implemented CI/CD pipelines to build Dockerized frontend applications and deploy them to Kubernetes across **4 frontend repositories** — the three portals plus a repository that tracks VELA's data with the external systems it integrates with — with automated unit tests (Jasmine) and SonarQube quality gates as release gates.
- Refactored and modernized legacy UI modules (component-level change-detection optimization, Bootstrap-to-Tailwind CSS migration) while keeping production releases stable.
- Led a team of **8 frontend developers**: code review workflow, coding standards and a GitFlow-based branching strategy.

Senior Frontend Developer
Dec 2021 – Jul 2023

AMIT Group Joint Stock Company — Ho Chi Minh City

- Developed and delivered multiple enterprise and client-facing web applications with **React/Next.js** in TypeScript, using **Server-Side Rendering** for SEO-critical and data-heavy views (see Projects: SOGUS, Medbuy).
- Built and integrated REST APIs with Node.js (NestJS) and Laravel to support frontend features.
- Led small frontend teams (**3–5 developers**): task planning, code review and technical mentoring.
- Deployed and maintained production applications on Linux servers; participated in containerized deployment with Docker.
- Contributed to project estimation and technical scoping, working directly with customers on requirements.

Frontend Developer

Jun 2018 – Dec 2021

AMIT Group Joint Stock Company — Ho Chi Minh City

- Built responsive web applications with React, Angular and WordPress for enterprise clients.
- Developed fullstack features with PHP/Laravel and MySQL (see Projects: Kensa Order System).
- Previously completed a frontend internship at AMIT Group (Jun–Dec 2017), returning full-time after graduation.

PROJECTS

SOGUS — Online Examination & Assessment Platform

Nov 2022 – Jul 2023

Candidate screening platform supporting multiple assessment formats, including multiple-choice and essay questions. Project team of **10**.

Tech: `React, Next.js (SSR), TypeScript, Angular, Java, PostgreSQL`

- Built the candidate-facing landing, interview and testing flows with **React/Next.js (Pages Router)** in TypeScript, using **SSR** for SEO-critical pages and fast first render.
- Designed the frontend architecture across two separate applications — React/Next.js for the candidate-facing flows, Angular for the internal administration portal.
- Coordinated the frontend workstream: task planning, progress tracking, PR review and coding standards.

Medbuy — Pharmaceutical E-commerce Platform

Dec 2022 – Jul 2023

E-commerce platform connecting pharmaceutical suppliers, agents and end users. Project team of **10**.

Tech: `React, Next.js (SSR), NestJS, TypeScript, Docker`

- Built responsive, design-accurate user interfaces with React/Next.js, applying **SSR** for product and listing pages, in close collaboration with UX/UI designers.
- Collaborated with the backend team on REST API contracts and integrated the APIs into the Next.js frontend.
- Participated in containerized deployment with Docker.

Kensa Order System — Order & Customer Management

Mar 2021 – Jul 2021

Order management system with Admin and Customer portals: order tracking, revenue reporting, self-service ordering and payment. Team of **2**.

Tech: `React, Laravel, MySQL, Docker`

- Designed and built the fullstack system end-to-end, including REST APIs for order processing and reporting.
- Integrated VNPay and Payoo payment gateways for secure transaction handling.
- Deployed and operated the production system on Linux with Docker.

SKILLS

FRONTEND	React, Next.js (SSR/SSG), TypeScript, JavaScript, HTML5, CSS3/SCSS, Angular, Webpack, Vite
WEB PERFORMANCE	Bundle analysis & optimization, code splitting, lazy loading, Lighthouse / PageSpeed Insights
ARCHITECTURE	Nx Monorepo, Micro Frontend, Module Federation, SSR/CSR/SSG rendering strategies
STATE & DATA	Redux Toolkit, TanStack Query, Zustand, RxJS, REST API, GraphQL
TESTING & QUALITY	Jest, React Testing Library, Cypress, integration & E2E testing, debugging & troubleshooting, Jasmine, SonarQube
DEVOPS & TOOLING	Docker, Kubernetes, Linux, CI/CD, Git, AWS (EC2, S3, CloudFront, Route 53, IAM)
UI LIBRARIES	Material UI, Ant Design, Tailwind, Bootstrap
BACKEND	Node.js (NestJS, Express), PHP (Laravel)
AI-ASSISTED DEV	Claude Code, Cursor — coding, debugging, refactoring, test generation

EDUCATION

Bachelor of Information Technology

Oct 2013 – May 2018

University of Transport and Communications — Ho Chi Minh City Campus
