---

## PROFESSIONAL SUMMARY

Senior Frontend Developer (React/Next.js) with 8 years of experience building high-performance web applications at enterprise scale. Deep expertise in React/Next.js, TypeScript, Micro Frontend architecture with Nx Monorepo, and performance optimization. Experienced in leading frontend teams while remaining hands-on. Seeking a senior frontend role with end-to-end ownership of frontend architecture and product quality.

## WORK EXPERIENCE

### Frontend Team Leader (hands-on)

Jul 2023 – Mar 2026

Indo Trans Logistics — Ho Chi Minh City

VELA Logistics Platform — multi-tenant logistics platform with 3 portals: Core Portal (internal operations), Customer Portal and Supplier Portal (both multi-tenant). Project team of **60**; led the frontend team of **8**.

- Architected the frontend for all **3 portals** using a Micro Frontend architecture (Nx Monorepo, 1 Host + multiple Remotes), enabling independent deployment and parallel team development.
- Built the Core Portal with React, Next.js and TypeScript — Redux Toolkit for application state, TanStack Query for server state and caching.
- Reduced the Core Portal's initial bundle size from **12 MB to 3 MB** by optimizing imports and implementing route-based lazy loading, improving initial load performance.
- Designed the multi-tenant frontend architecture for Customer/Supplier Portals (Angular), with tenant-based configuration and isolation for **3 tenants**.
- Built CI/CD pipelines for containerized frontend applications (Docker, Kubernetes), enabling consistent releases across **4 frontend repositories**.
- Led a team of **8 frontend developers**, establishing the code review workflow, coding standards and a GitFlow-based branching strategy.

### Senior Frontend Developer

Dec 2021 – Jul 2023

AMIT Group Joint Stock Company — Ho Chi Minh City

- Developed and delivered multiple enterprise and client-facing web applications using React/Next.js and Angular (see Projects: SOGUS, Medbuy).
- Led small frontend teams (**3–5 developers**): task planning, code review and technical mentoring.
- Built and integrated REST APIs with Node.js (NestJS) and Laravel to support frontend features.
- Deployed and maintained production applications on Linux servers.
- Contributed to project estimation and technical scoping, working directly with customers on requirements.

### Frontend Developer

Jun 2018 – Dec 2021

AMIT Group Joint Stock Company — Ho Chi Minh City

- Built responsive web applications with Angular, React and WordPress for enterprise clients.
- Developed fullstack features with PHP/Laravel and MySQL (see Projects: Kensa Order System).
- Previously completed a frontend internship at AMIT Group (Jun–Dec 2017), returning full-time after graduation.

## PROJECTS

### SOGUS — Online Examination & Assessment Platform

Nov 2022 – Jul 2023

Candidate screening platform supporting multiple test formats (multiple choice, essay). Project team of **10**.

**Tech:** Angular, React, Next.js, TypeScript, Java, PostgreSQL

- Designed the frontend architecture across two separate applications — Angular for the internal administration portal, React/Next.js for the candidate-facing landing, interview and testing flows.
- Coordinated the frontend workstream within the project team: task planning, progress tracking, PR review and coding standards.
- Worked with stakeholders to analyze requirements and propose technical solutions.

### Medbuy — Pharmaceutical E-commerce Platform

Dec 2022 – Jul 2023

E-commerce platform connecting drug suppliers, agents and end users. Project team of **10**.

**Tech:** React, Next.js, NestJS, TypeScript, Docker

- Built responsive, spec-accurate UI with React/Next.js in close collaboration with UX/UI designers.
- Designed and integrated REST APIs with the backend team (NestJS).
- Participated in containerized deployment with Docker.

### Kensa Order System — Order & Customer Management

Mar 2021 – Jul 2021

Order management system with Admin and Customer portals: order tracking, revenue reporting, self-service ordering and payment. Team of **2**.

**Tech:** React, Laravel, MySQL, Docker

- Designed and built the fullstack system end-to-end, including REST APIs for order processing and reporting.
- Integrated VNPay and Payoo payment gateways for secure transaction handling.
- Deployed and operated the production system on Linux with Docker.

## SKILLS

|                  |                                                                                 |
|------------------|---------------------------------------------------------------------------------|
| FRONTEND         | React, Next.js, TypeScript, Angular, Webpack, Vite                              |
| ARCHITECTURE     | Nx Monorepo, Micro Frontend, Module Federation                                  |
| STATE & DATA     | Redux Toolkit, TanStack Query, Zustand, REST API, GraphQL                       |
| TESTING          | Jest, React Testing Library, Cypress, E2E Testing                               |
| DEVOPS & TOOLING | Docker, Kubernetes, Linux, CI/CD, Git, AWS (EC2, S3, CloudFront, Route 53, IAM) |
| UI LIBRARIES     | Material UI, Ant Design, Tailwind, Bootstrap                                    |
| BACKEND          | Node.js (NestJS, Express), PHP (Laravel)                                        |
| AI-ASSISTED DEV  | Cursor, Claude Code — coding, debugging, refactoring, test generation           |

## EDUCATION

### Bachelor of Information Technology

Oct 2013 – May 2018

University of Transport and Communications — Ho Chi Minh City Campus
